NEW MACHINE USES WET MORTAR -- Lidova Demokracie, No 88, 14 Apr 49

The Czechoslovak Construction Plants have been experimenting with plastering machines in Prosek, where they are building dwellings which will be placed at the disposition of the district council in Vysocany. These consist of four blocks of 11 houses, each with 18 two- and three-room units. This project, begun 14 August 1948, will be finished by mid-August 1949. Before the war, such construction would have required 15 or 16 months.

The plastering machine, which is not perfected yet, uses wet mortar. The mortar is sprayed out under pressure and fills the cracks. In this way a 9.5 x 1.7 meter wall was covered twice in 19 minutes.
